	<b>Review date :</b>
	<b>Approval date : 19 June 2020</b>
	<b>(The Board of Director meeting no.4/2020)</b>
	<b>Effective date : 19 June 2020</b>
	<b>Supersede date :</b>

Berli Jucker Public Company Limited and the group company (hereinafter referred to as "BJC Group") emphasizes on sustainable natural resource management. Therefore, we have established guidelines for agricultural raw materials sourcing to support the reservation of the environmental and sustainable development.

### **Scope**

This guidelines applies to the business operations under Berli Jucker Public Company Limited and its subsidiaries.

### **Guidelines**

1. The procurement of agricultural raw materials must comply with the applicable laws, rules regulations of government, company policies, business ethics, and the code of business conduct.
2. Sharing knowledge and helping business partners who are agriculturists to operate business with the company group and grow together sustainably.
3. Supporting the protection of biodiversity and preserving the ecology in agricultural areas.
4. Promoting water consumption in agricultural production efficiently to reduce excess consumption of water and conserving of natural resources.
5. Supporting the protection of soil fertility and maintaining the quality of soil used in agricultural activities. Moreover, we do not encourage farmers to burn crops or humus to maintain soil fertility, prevent wildfire, and reduce air pollution.
6. Business partners should minimize use of agrochemicals and restrict use of pesticides that listed as hazardous substances by law.
7. Considering transport distance for agricultural raw material between cultivated areas and product distribution areas to maintain product quality, reduce cost and environmental impact caused by transportation.
8. Supporting the distribution of organic products to promote the health and safety of customers.
